

Make your measuring tape.

A 200 cm tape for checking your measurements.

Print at 100%. Check before cutting.

Use A4 landscape paper and print all three pages single-sided at Actual size (100%). Turn off Fit to page and Shrink to fit.

Measure the check line with a rigid ruler. If it is not exactly 10 cm, correct the print settings and print again.

01 Cut the strips

Cut around the dashed outlines. Keep the shaded tabs.

02 Match the ends

Join strips 1-8 in order. Match the cm end marks, overlap only the tabs, then tape each join.

03 Measure without pulling

Let the paper sit snugly. Keep it flat and do not stretch it.

You will need

Printer and paper

Scissors

Clear tape

A rigid ruler

One continuous tape

200 cm

8 strips / 7 joins

Centimetres and inches

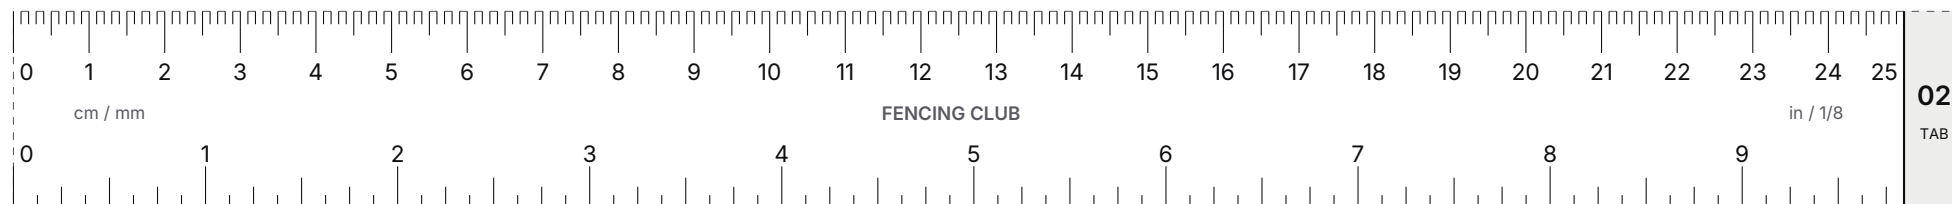

10 cm check line on every cutting sheet.

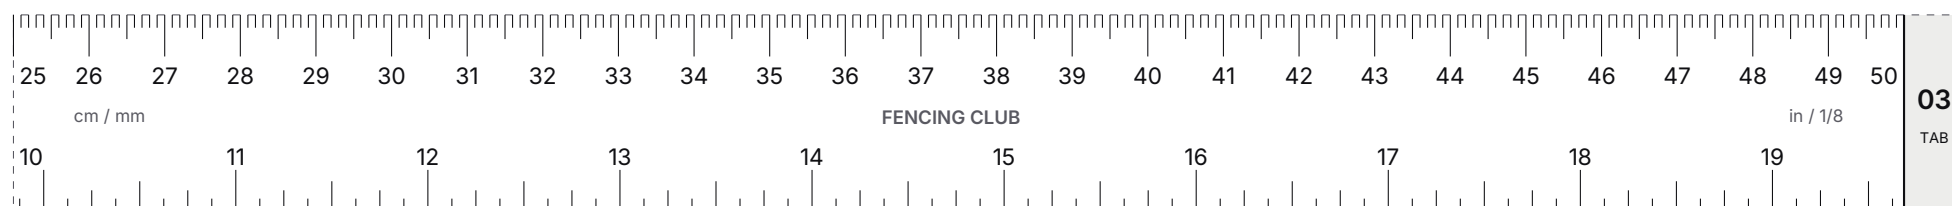

Strips 1-4 / 0-100 cm

Actual size (100%). Check the line below before cutting.

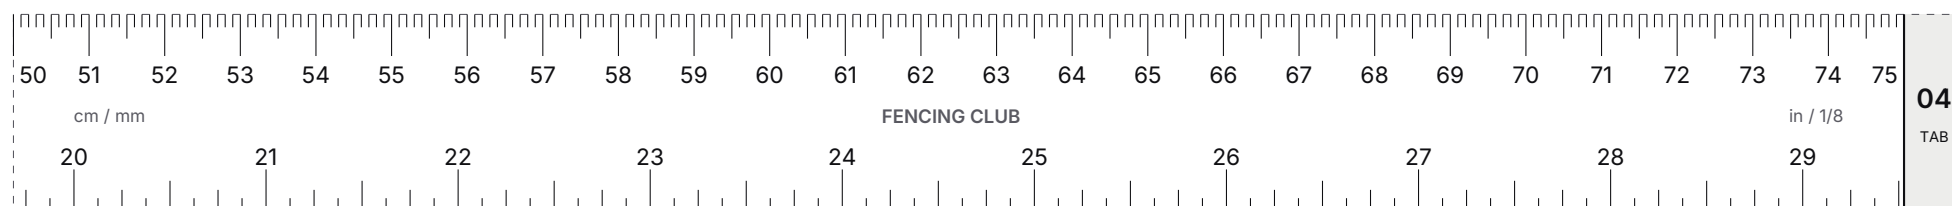

01 / 0-25 cm

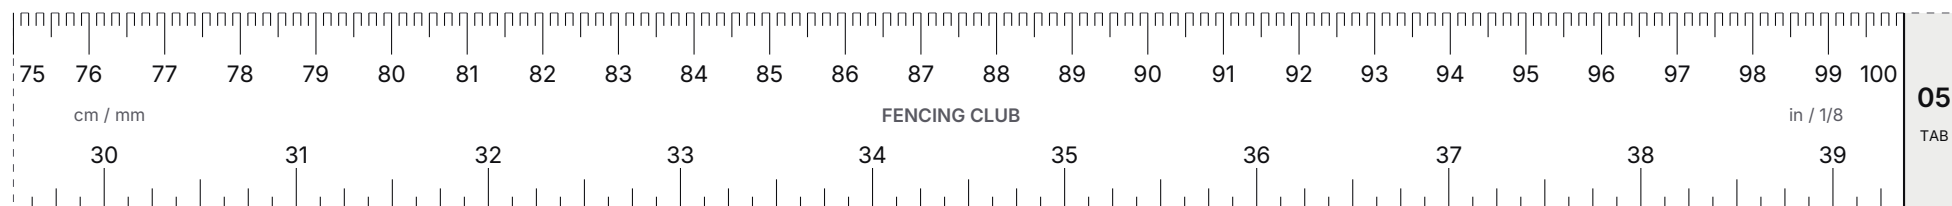

02 / 25-50 cm

03 / 50-75 cm

04 / 75-100 cm

10 cm print-scale check

Measure between the two end marks.

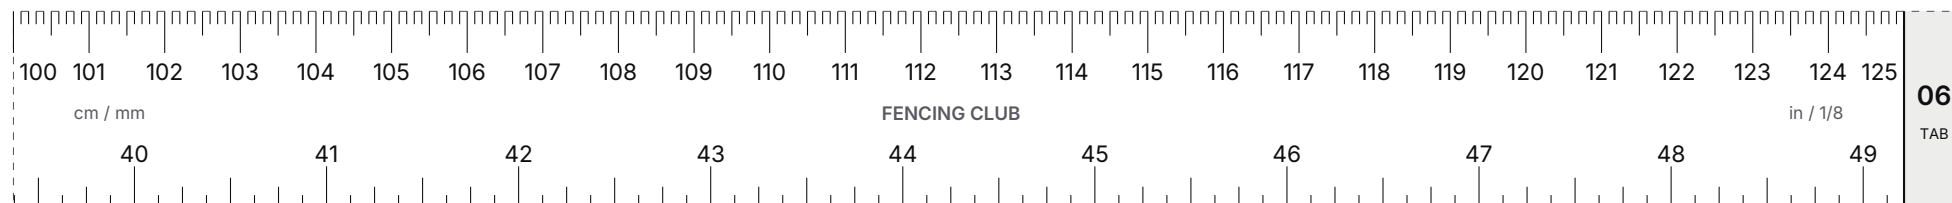

Cut dashed lines. Keep the tabs.
Join at matching cm marks; do not add a gap.

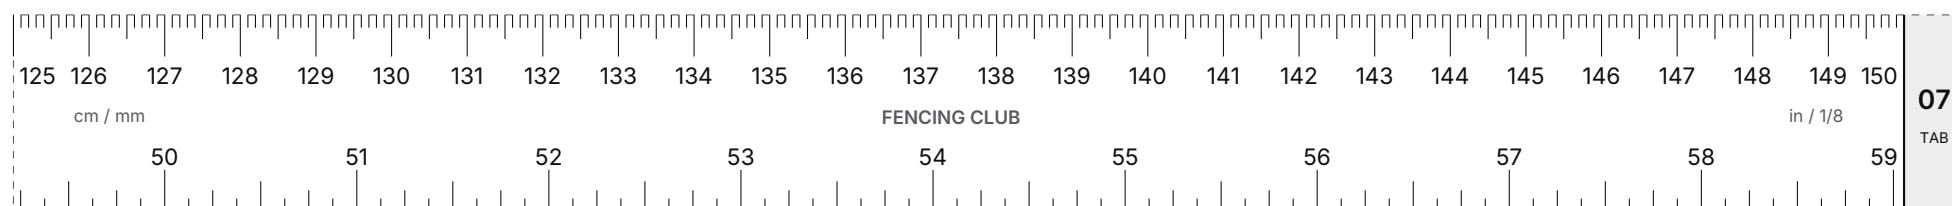

Strips 5-8 / 100-200 cm

Actual size (100%). Check the line below before cutting.

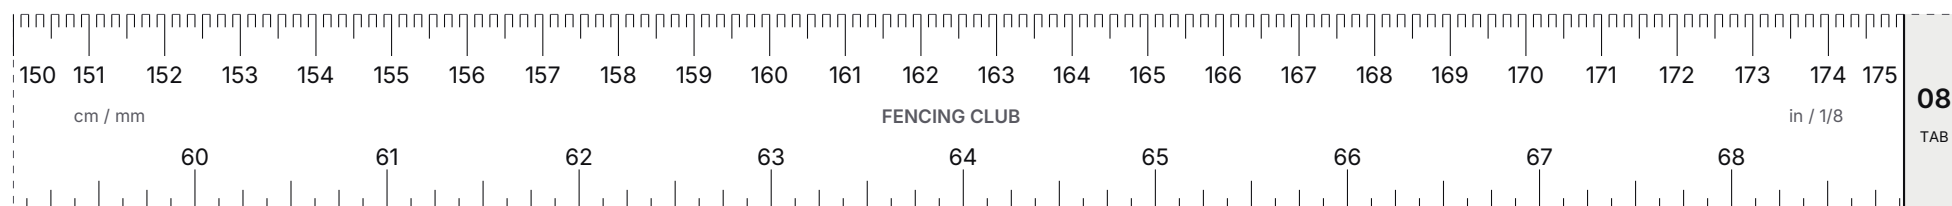

05 / 100-125 cm

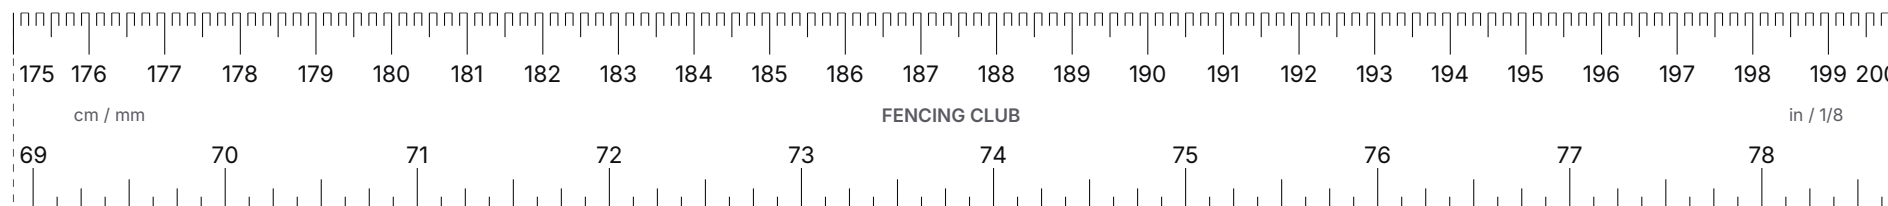

06 / 125-150 cm

07 / 150-175 cm

08 / 175-200 cm

10 cm print-scale check

Measure between the two end marks.

Cut dashed lines. Keep the tabs.
Join at matching cm marks; do not add a gap.
